EXPERIENCE

Data Engineer

Globant

03/2024 - Present Pune India

EYWP helps to design and implement new efficient models to deliver transformation and M&A strategies

- Designed and implemented end-to-end ETL pipelines using Azure Data Factory, orchestrating complex data flows with multiple Databricks notebook activities and custom parameters for dynamic execution
- Developed robust PySpark code in Azure Databricks notebooks to perform complex data transformations
- Implemented Structured Streaming in Databricks to process real-time data from Kafka
- Tuned Spark configurations for optimal resource utilization, implemented data skew handling techniques, applied broadcast joins and partition optimization
- Used Git for version control of Databricks notebooks
- Designed operational dashboards for pipeline monitoring and created visualizations for pipeline success/failure rates and performance metrics

Data Engineer

Globant

12/2021 - 02/2024 Pune India

Account Lens is an Automated Account Management Platform to help accounts drive actions around relationships and sales

- Extracted data from multiple sources, i.e., Neo4j graph DB, APIs, Azure etc
- Performed transformation using Spark 3
- Assembled large, complex sets of data and cleaned and wrangled data from primary and secondary sources
- Developed data tools and APIs for data analysis
- Built pipelines using Apache Oozie for Hadoop jobs

Data Engineer

Principal Global Services

03/2020 - 12/2021 Pune India

Eligibility helps internal auditors find participants eligible for retirement plans

- Worked on decision-making report creation for retirement process based on sales and criteria
- Analyzed and organized raw data, customized and managed integration tools, databases, and analytical systems
- Loaded disparate data sets and conducted pre-processing services using Hive
- Optimized multiple jobs in Spark running on Hortonworks distributed system
- Collaborated with the software research and development teams

Data Engineer

DXC Technology

05/2019 - 02/2020 Indore India

SICS supports all lines of business for both assumed and ceded reinsurance administration

- Actively participated in design and development requirements
- Involved in developing business logic and DAO implementation
- Designed database tables, reporting, and wrote queries and logic operations
- Wrote utilities for communication with Oracle
- Formulated JUnit test cases/unit testing

Software Engineer

Vengai Software Solutions

04/2017 - 04/2019 Hyderabad India

The main objective was to load parcel invoices from various customers and rate those invoices

- Participated in design and development of project requirements
- Created and maintained database queries
- Maintained and developed unit cases
- Involved in development of Swagger documentation

SUMMARY

I am a Data Engineer with over 6 years of experience in the IT industry in the Big Data domain. I excel in using technologies like Spark, Java, and Hadoop to process and transform data. I have proven skills in developing and deploying end-to-end applications and REST APIs with a keen focus on leveraging cloud services and analytics platforms to deliver value-driven solutions.

EDUCATION

Master of Computer Application

SGSITS Indore

08/2014 - 06/2017 Indore

Bachelor of Science

Jiwaji University Gwalior

08/2010 - 06/2013 Gwalior

SKILLS

Agile	Apache	Apache Hadoop		
Apache Kafka		Apache Spark		
AWS Lambda		AWS Redshift	Glue	
Azure	Azure Data Factory		EMR	S3
Azure Databricks		Azure SQL		
Azure Storage		Big Data	Databricks	
ETL	ETL Pipelines		Git	Hadoop
HDFS	Java	JUnit	Kafka	PySpark
Python	REST	SQL	Unit Testing
